Foreword

Stefan Halusa

Director General, Indo-German Chamber of Commerce

“ **As India’s most important trading partner within the European Union, German exports are directly affected by the QCOs (Quality Control Orders) of the BIS (Bureau of Indian Standards).**”

Since its inception in 1956, the Indo-German Chamber of Commerce has always been the first point of contact for German companies, for a successful entry into the Indian market.

With our local experts and our service brand DE International, we see ourselves not only as a mediator in the bilateral trade discourse, but also as an active catalyst and a active platform for exchange of current important information for our almost 4,000 Member companies in India and Germany. We are pleased to share this guide with our Members. It is intended to support German companies with their BIS-Certifications.

This guide will help in eliminating misunderstandings, and educate about current and future BIS-Certifications, therefore helping German companies successfully comply with all BIS standards. This allows them to export their products successfully to the Indian market and create sustainable jobs in India.

Foreword

Himanshu Dhundia
Advisor, GPQI Country Component India

“ This practical guide provides guidance on Quality Control Orders (QCOs) and their compliance procedures, which will further support the industry.”

Quality, sustainability and security play an increasingly important role when it comes to bringing people and markets together. Bilateral cooperation in the field of technical and regulatory framework conditions therefore plays an important role in promoting bilateral trade and well-functioning supply chains between India and Germany.

The Global Project Quality Infrastructure (GPQI) of the German Federal Ministry for Economic Affairs and Climate Action (BMWK) was launched in 2017 to reduce technical barriers in trade, to increase product safety, and to strengthen consumer protection.

In India, GPQI supports the implementation of the activities of the Indo-German Working Group on Quality Infrastructure. Important stakeholders on both sides are involved in the political and technical dialogues between Germany and India: relevant ministries, subordinate authorities, QI bodies, industry associations and companies as well as technical and scientific institutions.

Technical regulations are crucial to improve the safety of products, consumers, workers and the environment. At the same time, they can affect the facilitation of doing business and impose significant costs on manufacturers and exporters.

As part of the GPQI, stakeholders are informed about new technical regulations and regulatory changes at an early stage. In the event of challenges in the implementation of announced regulations, the GPQI provides support in the form of dialogue with the partners and stakeholders involved in the project are developing solutions for this.

Foreword

Louis Gogger
Managing Director, MPR International

“ Our support goes beyond mere consulting. We guide our clients through the entire approval process, offering comprehensive assistance to ensure your products comply with Indian regulations while minimizing your workload.”

MPR International GmbH is your trusted partner for companies aiming to navigate the dynamic and complex Indian market. With extensive expertise and a broad range of services, we help manufacturers successfully certify their products and achieve market entry in India.

Recognizing the increasingly complex regulatory environment in India, we understand the challenges that companies face. The numerous regulations and frequent changes require in-depth knowledge and thorough preparation for a successful market launch.

Our support goes beyond mere consulting. We guide our clients through the entire approval process, offering comprehensive assistance to ensure products comply with Indian regulations while minimizing your workload. We look forward to being a reliable partner, guiding you safely through the complexities of the certification process.

What are technical regulations in the form of QCOs?

Product quality is most important for human health, consumer safety, and for climate and environmental protection. A way to ensure that products and services are compliant is through technical regulations.

The WTO Agreement on Technical Barriers to Trade (TBT) defines technical regulations as documents that specify mandatory product characteristics and the associated processes and production methods. This also includes packaging, labelling or labelling requirements.

Confirming to Article 16(1) of the Bureau of Indian Standards Act, 2016, the Government of India may notify such technical regulations if it is in the public interest, contributes to the protection of human, animal or plant health, serves the safety of the environment, or is intended to prevent unfair trading practices or national security. Technical regulations in India

are then in the form of so-called Quality Control Orders (QCOs). With these QCOs, the Indian government obliges manufacturers to comply with Indian standards and to provide a corresponding BIS certification. Such regulations apply to a wide range of products, from electronics to furniture (see Chapter 2).

For the import of German goods to India, this means that these have to meet the mandatory requirements of the QCOs. Depending on how it is specified in the respective QCOs, this can also include components and spare parts. That can cause additional cost and requirements for German companies (e.g. obtaining information on applicable regulations, testing and certification costs, etc.). It is therefore important that companies wishing to export goods to India familiarize themselves with the current QCOs of the BIS and ensure that their products meet the requirements.

Which product groups are already affected?

Until recently, there were relatively few technical regulations in India, but that has changed quickly. India strengthened its regulatory framework for products by requiring compliance with a growing number of technical standards.

In recent years, there has been a significant increase in the number of products reported and regulated by the Government of India. In comparison to 146 products being regulated in March 2018, as of July 2024, the number has raised to 727 products. The scope of the regulation has expanded, and more products have been added to the list of items to be regulated soon. In addition the product categories covered by these

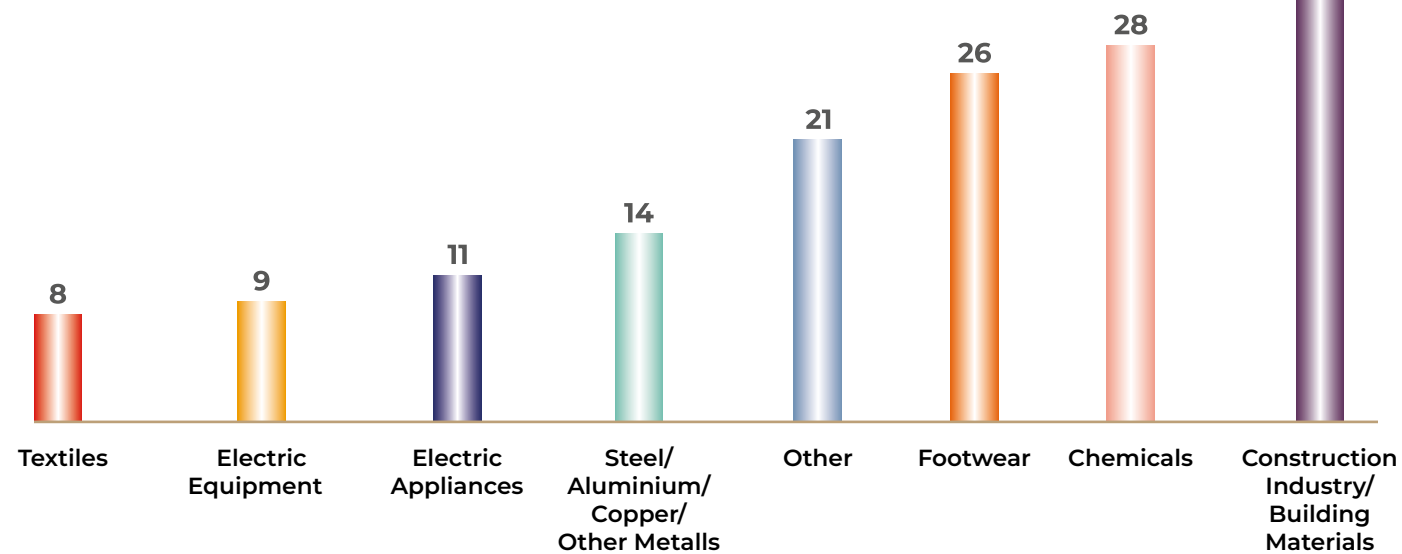

QCOs have expanded, more industrial products have been added to the list as compared to previous consumer goods.

Along with the products already regulated, QCOs were reported for 188 products that will be implemented from August 2024. The first chart shows the percentage of each product category in the 188 products, while the second chart shows the actual number of products in each category. Both graphs were created based on the information from 15.07.2024.

The analysis of the 188 notified products shows a trend towards comprehensive regulation in different sectors. The focus on Building Materials, Chemicals and Metals reflects the government's priority on infrastructure and industry standards.

At the same time, the regulation of consumer goods such as electrical appliances, shoes and textiles ensures the safety and quality for the end consumer.

Number of products

Percentage of each category

Which Indian institutions are involved in the preparation of the QCOs?

QCOs in India are usually enacted by the line ministries of the central government that are responsible for the product group to be regulated. There is no clearly defined procedure that specifies for which products or product groups (new) QCOs will be implemented. In most cases, this is done on the basis of recommendations from BIS or the ministries concerned. New QCOs are enacted, for example, in response to similar technical regulations in other countries, or when hazardous or substandard products are produced by domestic manufacturers or importers flood the Indian market.

The Indian central government releases new QCOs after consultation with the BIS. The notified products must then comply with the Indian standards mentioned there and bear a standard mark in accordance with the BIS certification procedure.

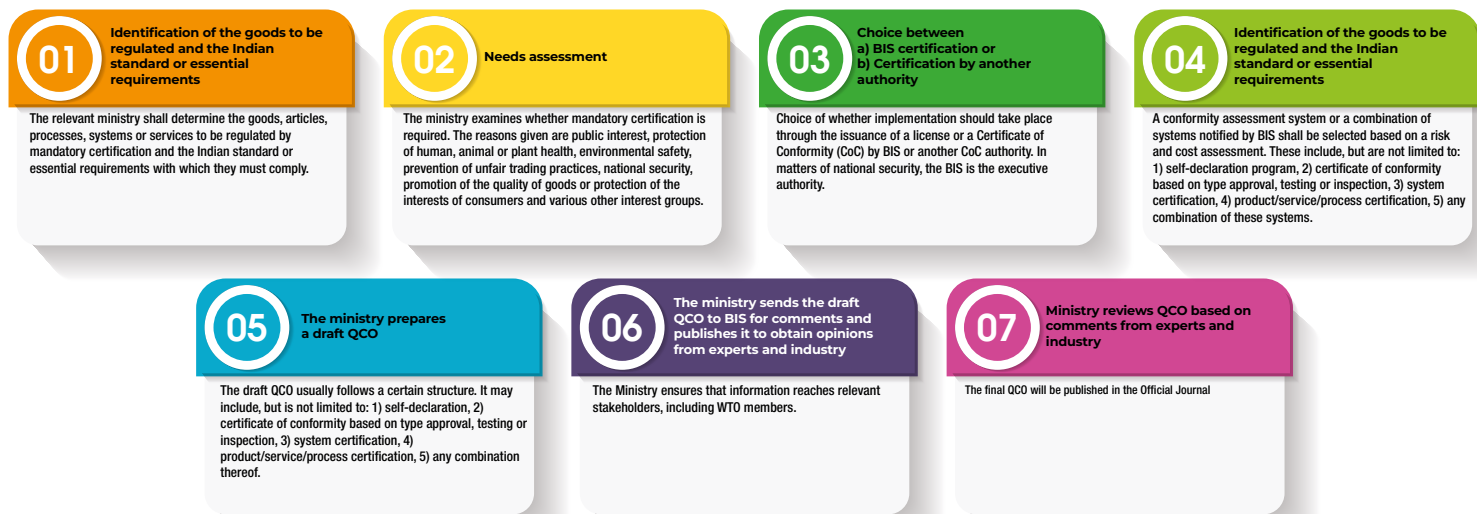

While the line ministries are responsible for the content of the QCOs, the responsibility for implementing the QCOs lies with BIS.

The Indo-German Working Group on Quality Infrastructure facilitates a special dialogue format for political and technical exchange. As a multi-stakeholder platform, it brings together representatives of the government with experts from the public and private sectors. This also includes technical organizations, associations and industry. As part of the dialogues, drafts of new QCOs are shared with the German private sector, among other things.

Comments, missing information and challenges in the implementation of QCOs can be reported back to the GPQI team. Under the framework of the Indo-German Working Group dialogue on Quality

Infrastructure, these are then taken up with the relevant line ministries and/or BIS. During the public consultation phase on the draft of new QCOs, the GPQI team collects the feedback from the German industry and feeds it back to the relevant bodies in a consolidated manner.

After the release of (new) QCOs, the GPQI team supports in clarifying questions or problems related to implementation. These activities take place within the framework of the Indo-German Working Group on Quality Infrastructure, with the aim of reducing technical barriers to trade.

The BIS-Certification

If you want to import or distribute goods in India, you must comply with a variety of special regulations and mandatory product certifications. BIS certification applies to both imported and India-produced goods. The sale, import and labelling of products that are subject to certification but do not yet have a valid certification are not permitted under Indian law.

The technical regulations (known in India as Quality Control Orders, or QCOs) are the basis for BIS certification. These QCOs, notified by the relevant ministries, set out the framework for compliance, such as the applicable ones. Further details on BIS certification, such as e.g. the certification process, the requirements for marking products, etc., are included in the BIS (Conformity Assessment) regulations. Each product group has its own regulations for implementation. The BIS licence granted to manufacturers must operate in accordance with the BIS Regulation and must be amended in case the standards or the variety covered change.

The BIS is the national Standards Body of India and is responsible for the development and publication of Indian standards. In addition, BIS implements certification schemes and operates laboratories for testing to support certification. BIS is the central authority in India responsible for product certification. There are four certification schemes, used by the BIS: the product certification system for the use of the ISI mark (Scheme-I) for a wide range of industrial and consumer goods and the registration system (Scheme-II) for a wide range of electronics and IT equipment covered by the mandatory registration system (CRS).

In addition, there is also Scheme IV for certificates of conformity and Scheme X for the certification of upcoming Regulations for electrical equipment. The BIS is responsible for the implementation of the conformity assessment and supervises the necessary tests of the product and carries out the certification processes.

Products affected:

- Household & Industrial Electronics
- Steel
- Chemicals
- Some automotive components
- Some foods such as milk and drinking water
- Etc.

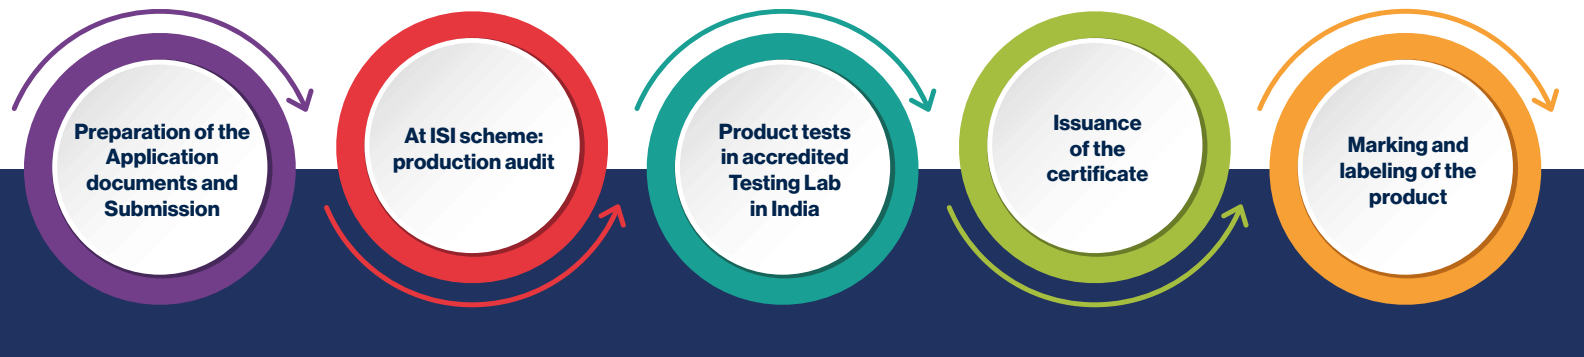

The BIS (then Indian Standards Institution) started operating the Certification Marks Scheme in the framework Indian Standards Institution (Certification Marks) Act of 1952. The scheme was officially introduced in 1955 and is popularly known as the "ISI Marking Scheme". The ISI marking scheme gained considerable importance in 2016 with the adoption of the BIS Act. Its main objective is to ensure that manufacturers' locations

comply with quality and safety standards in India and abroad (if the products are made for import to India).

The BIS- Certification Process

The certification process includes 4 levels in the CRS scheme and 5 levels in the ISI scheme

THE STEPS OF A BIS CERTIFICATION AT A GLANCE

• Preparation and Application

The first step is to check whether the product is subject to the BIS certification requirement and if so, under which scheme it falls (ISI or CRS). As soon as the required application documents have been prepared and checked, they are submitted to the authority. It is crucial that the information in all documents is complete, consistent and comprehensive in order to avoid subsequent revisions.

• FACTORY INSPECTION / PRODUCTION AUDIT

In the ISI and X schemes of BIS certification, the Indian authority is required to inspect the production site. This inspection includes a review of production quality standards and the on-site testing facilities. Manufacturers must ensure that their factory has appropriate testing facilities in place that comply with Indian requirements. In the CRS scheme, the audit is not required.

• PRODUCT TESTING

Test samples are sent to India and then tested by an accredited test laboratory. If the tests are successfully passed, the test reports are issued. In the ISI scheme, the test samples are selected by the auditor during the factory audit.

• ISSUANCE OF THE CERTIFICATE

After successful completion of product testing the BIS certificate is issued.

• MARKING

After the certificate is issued, the component can be marked accordingly.

An Authorized Indian Representative (AIR) must be appointed as part of the certification process. The AIR serves as the central point of contact for the authority and takes on important tasks in the certification process, such as submitting the application and forwarding test reports to the authority. The AIR can basically be provided by any Indian company, such as a subsidiary, sales office, or local importers and

distributors, although the choice should be considered carefully. Although it is possible to change the AIR at a later stage, doing so requires the involvement of the current representative. This can potentially strain otherwise healthy business relationships if the AIR fails to provide adequate support for the BIS certification process. Therefore, choosing the right AIR is crucial. If required, MPR International can also provide you with an AIR and offer you extensive support in communicating with the authorities.

PRODUCT TESTS

The product tests are usually carried out in an accredited test laboratory in India, as there are currently no accredited laboratories outside the country. Under the ISI scheme, however, it is sometimes possible to carry out the tests at the manufacturer's premises as so-called witness tests in the presence of an accredited witness, usually the BIS auditor. This is necessary if none of the laboratories accredited in India can offer the necessary product tests.

REQUIREMENTS OF THE FACTORY INSPECTION

The factory inspection is a mandatory requirement in the ISI & X schemes of BIS certification. This requirement significantly extends the duration of the entire certification process, as the Indian authority requires a few weeks or more lead time due to their heavy workload. Furthermore, for most product groups it is necessary to have test facilities on site at the factory. The specific test requirements are described in the BIS product manuals and are based on IEC standards.

The purpose of the inspection is to check whether the manufacturing plants meet the certification guidelines on quality management and whether all relevant regulations are known and also fulfilled in the plant. The Indian auditors want to clarify the following points during the factory inspection:

- Does the manufacturer's Quality Management system meet Indian requirements?
- Does the information on the plant and products provided in the application reflect reality?
- How does the manufacturer ensure the conformity of production?
- How are the results of tests and quality controls documented?
- Is sufficient testing equipment available to be able to test in-house according to Indian standards?

The duration of the factory inspection is usually 1-2 days, depending on the product type and the number of products to be certified. However, in some cases multiple Indian standards may be relevant for a plant, which can significantly increase the duration of the plant audit. Manufacturers are obliged to give the auditor access to the areas of production and quality management related to the parts to be certified. Access to areas unrelated to the parts to be certified is not required.

The following requirements must be met by the plant for the audit:

- The manufacturer's quality management system must meet Indian requirements and be updated regularly.
- The implementation of the marking must be documented, and the documentation must ensure that the markings are not applied to products that have not undergone type approval or that have been modified after the type approval process. Appropriate procedural instructions must be in place at the plants.
- The plant where the products are produced must be equipped with necessary testing facilities or otherwise be able to ensure that the products are regularly tested for compliance with the standards. Maintenance and calibration must also be monitored.
- The manufacturer's employees must be appropriately qualified to ensure quality standards are met.
- The plant must establish a qualified record keeping method that supports logging and archiving.
- The handling of defective products must be regulated and documented accordingly.

Internal quality assurance is carefully reviewed for weaknesses during the audit. Good preparation in advance is therefore recommended. Descriptions of the most important manufacturing and testing processes as well as existing permits and official certificates must be compiled in advance for the factory inspection. The factory audit is much easier to pass for companies with ISO certification. Preparation for the audit should be carried out in accordance with the relevant regulations.

The audit is carried out on the basis of checklists. The requirements are generally similar to other international quality management guidelines.

CERTIFICATE ISSUANCE AND MARKING

After the product test results have been evaluated, the BIS-CRS certificate or the BIS-ISI factory license is issued. Once the certificate is granted, the certified products can be appropriately marked.

There are two markings: The ISI mark and the standard mark for products certified under the CRS scheme.

While the standard mark is mandatory for certain types of electronics and IT products, the ISI mark covers both mandatory and voluntary product categories. In late 2021, BIS announced that in the future the ISI mark will be used for all products approved by BIS. No further information on when this change will be implemented has been provided until the date of publication. It should also be noted that the ISI scheme requires the total number of markings used per year to be reported and paid for with a marking fee.

Please be aware that components of products not directly subject to BIS certification, such as electric motors or screws, may still require certification when shipped independently. Customs officials occasionally make incorrect determinations regarding which products, systems, and components require certification. Therefore, it is crucial that your products arrive at customs with accurate and complete documentation.

MAINTENANCE OF THE CERTIFICATE VALIDITY

Manufacturers holding a BIS certificate must continuously comply with the applicable Indian regulations for BIS certification. This includes the requirements in the Indian Standards. The applicant assures the Indian authorities that it will provide timely notice of relevant changes, submit the required applications, and implement the changes only after the certification authority has given its approval.

FOLLOW UP AUDITS AND TESTS

To maintain the validity of a BIS certificate, annual product tests must be conducted (BIS ISI only). However, manufacturers may submit in-house test reports if the test facilities inspected during the initial audit meet Indian requirements. Factory inspections are typically not required to be renewed, but the authority may request them in specific cases, such as when a new standard becomes applicable to the certified facility.

The CRS scheme generally does not require inspections for initial approval or retesting of certified products to extend a certificate. However, the authority reserves the right to request additional product tests or carry out tests independently as part of market surveillance activities, referred to as "BIS Surveillance".

CHANGES IN STANDARDS AND REGULATIONS

The Indian authorities are always working on optimizing the standards. As soon as a new Indian Standard is adopted and comes into force, all BIS certificates must refer to the new standard by the deadline specified in the official announcement. Certificate holders whose certificates refer to the old standard must apply to amend the Indian Standard and have product tests conducted in accordance with the new standards before the deadline to maintain compliance. The lead time for amendments is relatively quick to obtain compared to an initial certification process.

Current certificates must always refer to the current standards. If the change request is not submitted, existing BIS certificates will be suspended or cancelled by the Indian authorities if the change deadline is missed.

The certificate change may either be a simple, formal update or one that includes a test requirement, depending on the revised standards. In both cases, an amendment application must be submitted to the authority, and their requirements must be fulfilled.

According to the process, notifiable changes generally include the following circumstances:

- Change to the product design
- Change to the structure of the product (e.g. adding another layer of material to the housing)
- Changes to a core "key component" (e.g., an electrical component)
- Change of raw material
- Change of material suppliers

If more extensive adjustments to the certified product itself are planned, the applicant may need to submit for re-testing of the product in an Indian test laboratory. If the production line or even the entire plant is to be relocated, a new initial certification is usually always required. Applications for amendments must be submitted when updating the Indian Standards or the implementation regulations.

The regulations of the Compulsory Registration Scheme explicitly state that the responsible certification authority decides in each individual case whether an official change application must be submitted and, if so, what the consequences are for the certificate holder as a result of the change.

Certification FAQ

How do I find out if my product requires BIS certification?

The relevant information can be found on the websites of the certification authority regarding the product groups requiring certification. To obtain a reliable result, the

manufacturer should inquire directly with the Indian authorities about the certification requirement of their product on the basis of specifications and technical data.

(<https://www.bis.gov.in/index.php/product-certification/products-undercompulsory-certification/>)

Important web links:

[Scheme - I \(ISI Mark Scheme\) - Bureau of Indian Standards \(bis.gov.in\)](#)

[Scheme - II \(Registration Scheme\) - Bureau of Indian Standards \(bis.gov.in\)](#)

[Upcoming QCOS - notified and due for implementation - Bureau of Indian Standards \(bis.gov.in\)](#)

Can I carry out the certification process on my own?

In general, anyone can apply for certification of their products on their own. However, lack of relationships, incomplete knowledge and lack of experience can lead to considerable loss of time and significant additional costs. It is required that you familiarize yourself with the regulations and documents for BIS certification.

Do I need to travel to India during the certification process?

No, it is not necessary to travel to India. However, sometimes it may be advisable to be there in person to coordinate product testing for complex products with the testing laboratory. In some cases, this results in a simplified process, fewer tests and therefore lower costs.

What is the best way to prepare for certification?

BIS certification testing follows specific regulations. It makes sense to familiarize yourself with the regulations that apply to you, understand these regulations and read the checklists.

Do I have to worry about intellectual property being tapped during the certification process?

BIS certification is not designed for this purpose. With proper preparation, you can tailor the testing to minimize the amount of internal expertise that becomes available. Submitting only rough product drawings and being smart with application documents can further minimize risk.

Will my certificate lose its validity?

The BIS registration according to CRS is valid for 2 years and can then be renewed. The certificate does not lose its validity as long as you carry out the required follow-up certifications, provided that certificate

changes are properly reported to the Indian authority.

The BIS certificate according to ISI or Scheme X is initially valid for one year. Annual tests and further proof of compliance are required to maintain it. In all cases, approvals can be extended for up to 5 years at the first renewal.

Can I supply the Indian market without any hurdles once the BIS certification is issued?

Yes, once the certification is completed and the mark is affixed, the Indian market can be fully accessed. However, the BIS certificate does not cover all parts produced by a factory; certification is limited to individual product groups or models for which BIS certification has been requested.

As a certified company, will I be informed of changes in regulations by the Indian authorities?

No, changes in the regulations and requirements are only published, the companies must inform themselves and familiarize themselves with the regulations. It is the responsibility of each certificate holder to keep themselves updated about the current regulations and standards applicable to their product.

Does the quality manager or any other person in the company need special training?

Generally, no special training is required for a BIS certification if the plant has already been certified to ISO or other quality management guidelines, as this is irrelevant for 99% of international manufacturers. BIS just checks that whoever is appointed to QM has sufficient qualifications and experience.

Which plants must be audited for BIS certification?

The plant to be audited is the one where the overall product is manufactured or where the final quality assuring steps are taken. If a product is manufactured at multiple locations, it is not always clear which plant is responsible for BIS certification. Since answering this question is essential for successful certification, it should be clarified with the greatest possible care.

Change management: When do I need good change management? What do I need to do to optimize change management in advance?

Every change to the certificate involves costs. Applicants should therefore plan and organize their change management carefully. Either you decide to deal with the rules yourself and apply them according to your industry or hire an experienced service provider. The automotive industry is a good example of an industry where forward-looking change management is crucial.

BIS ISI vs. BIS CRS

BIS CRS (COMPULSORY REGISTRATION SCHEME)

Objective: The CRS mainly affects electronics and similar products. Under this scheme, such products must meet specific standards mandated by the government before they can be sold or distributed in India.

Applicability: This scheme is applicable to a range of electronic and IT products, including mobile chargers, LED lights, and other electronic appliances. The specific products included in this scheme are notified by the Ministry of Electronics and Information Technology (MeitY).

Regulatory Requirement: CRS is a mandatory requirement. Manufacturers must obtain BIS registration to market the specified products in India. Selling such products without the required CRS is against the law.

BIS ISI (INDIAN STANDARDS INSTITUTE CERTIFICATION)

Objective: The ISI mark signifies that a product conforms to a specific Indian standard, as defined by BIS. The focus is on quality assurance and is intended to bolster consumer confidence in various products.

Applicability: The ISI certification encompasses a broader range of products, including non-electrical items like cement, steel, and basic consumer goods. Almost any product can be ISI certified if it has a corresponding Indian standard.

Regulatory Requirement: The ISI mark is not universally compulsory but is often sought after for the competitive advantage it provides. Contrary to the CRS, the ISI certification can be obtained voluntarily, even if it is not a legal requirement. Granted, businesses can display the ISI mark on products, but the manufacturers are often subject to periodic checks and testing to ensure ongoing compliance.

SUMMARY OF DIFFERENCES

MANDATORY VS. VOLUNTARY:

BIS CRS is compulsory for certain products, while ISI certification is often voluntary or selectively required. However, it should also be noted that the catalogue of products requiring a mandatory ISI certification is far more extensive than the catalogue for CRS.

Scope: CRS primarily covers electronic and IT products, while ISI applies to various product categories beyond electronics.

Regulatory Basis: CRS is driven by specific government mandates, while ISI certification is rooted in broader quality standards concerns.

Factory Audit and Product Testing:

Factory inspections are mandatory only under BIS ISI, whereas product testing in India is required for both ISI and CRS as part of the initial approval of any product. After the initial ISI audit is completed successfully, no further audit is required by BIS unless new standards, not covered during the initial inspection, need to be addressed.

In conclusion, while both BIS CRS and BIS ISI serve to enhance product quality and safety in India, they operate under different regulatory environments and cater to distinct product categories with varying levels of mandatory compliance.

The Role of an Authorized Indian Representative

ROLE OF AN AUTHORIZED INDIAN REPRESENTATIVE (AIR)

- **Representation:** The AIR acts as a liaison between the foreign manufacturer and the Bureau of Indian Standards or the relevant regulatory authorities in India. They represent the manufacturer in compliance matters and ensure adherence to local regulations.
- **Compliance:** The AIR is responsible for helping foreign manufacturers understand the requirements of QCOs applicable to their products. QCOs outline the mandatory standards that specific products must meet to be sold in India.
- **Application Process:** The AIR assists in the submission of applications for BIS certification and ensures that all documents required for this process are complete and accurate.

WHO CAN BE AN AIR?

An AIR can be Legal Entity: A registered company or entity in India that has a physical office and can handle the responsibilities outlined in the certification and compliance processes.

RESPONSIBILITIES OF AN AIR

- **Communication:** Maintain direct communication between the manufacturer and the BIS. This includes relaying queries, updates, and requests for information.
- **On-Site Inspections:** Facilitate BIS inspections, which may require an on-ground presence to aid in product assessments.
- **Product Testing:** Submit test reports to BIS after issuance from the accredited labs and potentially support facilitating the tests in India.
- **License Management:** Assist in the management and renewal of BIS licensing, providing timely updates and ensuring adherence to the certification.
- **Risk Management:** Help the manufacturer understand the risks involved in compliance failures, including potential penalties, confiscation, or refusal to market their products.

RISKS ASSOCIATED WITH AIR'S ROLE

- **Liability:** The AIR may assume certain liabilities if there is non-compliance or if the manufacturer does not fulfill the necessary obligations concerning the standards laid out by BIS.
- **Reputation Risk:** The AIR's reputation can be affected if the products of the represented manufacturer fail to comply with established standards.
- **Financial Risk:** Potential liability for damages or penalties incurred due to non-compliance.

STEPS INVOLVED IN THE WORK OF AN AIR

- **Application Submission:** Submit the application for BIS certification along with the required documents and fees.
- **Communication with BIS:** Engage with BIS to track the application status and respond to any queries.
- **Product Testing Coordination:** If required, arrange for product testing in appropriate labs and submit the test reports to BIS once available.
- **Facilitate Audits/Inspections:** Coordinate and assist during any BIS inspections or audits.
- **Issuance of License:** Upon successful certification, follow up on the issuance of the BIS license.
- **Post-Certification Compliance:** Ensure ongoing compliance and renewals.

The role of an Authorized Indian Representative is critical in navigating the complex regulatory landscape for foreign manufacturers wishing to enter the Indian market. Their work not only facilitates compliance but also helps in building trust and reliability within the framework of Indian regulation.

Machine certification in India under BIS Scheme X

On August 28, 2024, India's Ministry of Heavy Industries (MHI) announced updated regulatory measures affecting the machinery and industrial sectors. The following product categories have been included in the mandatory catalog of the Bureau of Indian Standards (BIS):

- Pump
- Compressors
- Thermal Processing Machines
- Centrifuges and filter machines
- Packaging machines: Machines for filling, sealing, labeling and packaging
- Cranes
- Construction machinery: Construction, earthmoving and mining machinery
- Textile machines: weaving machines, embroidery machines and their assemblies and components.
- Machine tools: machines for processing materials, including cutting machines and those for stone, ceramics, concrete and similar materials
- Plastics and rubber machinery
- Gears and drive elements: gears, sprockets, transmission elements and related components
- Electrical Machinery: Rotating electrical machinery such as generators, transformers, power semiconductor converters, and switchgear

The updated regulations aim to promote modernisation and increased efficiency in the machinery and industrial sectors. It also aims to achieve greater integration into broader policy initiatives. Compliance with the new requirements will thus become an essential prerequisite for the import and marketing of machinery in India.

The implementation date of the new regulations is August 28, 2025. Applications for the required certifications are already possible. However, longer processing times are to be expected initially, as additional clarification will be required and the authority will have an increased workload due to the implementation of the new requirements. Companies are therefore advised to start their procedures early, build up inventory, and prepare to implement the requirements.

Important links:

[Upcoming QCOS - notified and due for implementation - Bureau of Indian Standards \(bis.gov.in\) Scheme – X \(Certification\) - Bureau of Indian Standards](#)

In view of the complex processes, an extension of the deadline seems inevitable according to current assessments in order to avoid economic damage caused by an import ban. However, a decision on this is not expected until a few weeks before the current deadline expires.

Companies that want to export or distribute machinery to India should immediately check whether their products are affected by the new regulations. It is advisable to start the certification process early and build up inventory if necessary to avoid supply bottlenecks. In addition, companies should follow developments closely and regularly inform themselves about possible deadline extensions or further changes.

Sr No.	Description of Machinery and Electrical Equipment	HS Code
1.	All types of Pumps for handling liquids, liquid elevators and (or) their assemblies / sub-assemblies /components	841340, 841350, 841360, 841370, 841381, 841382, 841391 and 841392
2.	All types of compressors and (or) their assemblies /sub-assemblies /components	841430, 841440, 84148011, 84148090, 84149011, 84149019, 84149040 and 84149090
3.	All types of machinery for treatment of material by a process involving a change of temperature and (or) their assemblies /sub-assemblies /components	841932, 841939, 841940, 841950, 841960, 841981, 841989 and 84199090
4.	All types of centrifuges, filtering or purifying machinery for liquid and gas and (or) their assemblies /sub-assemblies /components	842111, 842112, 842119, 84212110, 84212190, 842122, 842129, 842131, 842139, 842191 and 842199
5.	All types of machinery for filling, closing, sealing, labelling bottles, packing or wrapping and (or) their assemblies/subassemblies /components	842220, 842230, 842240 and 842290
6.	All types of cranes and (or) their assemblies /sub-assemblies/components	842611, 842612, 842619, 842620, 842630, 842641, 842649, 842691 and 84269990
7.	All types of machinery for construction, earthmoving, Mining and (or) their assemblies /subassemblies/components	8429, 843010, 843020, 843031, 843039, 843041, 843049, 843050, 843141, 843142, 843143 and 843149.
8.	All types of weaving machines (looms) and (or) their assemblies/ sub-assemblies / components.	8446, 844811, 844819, 844842 and 844849
9.	All types of machinery for making embroidery and (or) their assemblies /sub-assemblies /components.	84479020 and 844859
10.	All types of metal cutting machines tools covered under the heading 8456 to 8461 and (or) their assemblies /sub-assemblies/components.	8456, 8457, 8458, 8459, 8460, 8461 and 846693
11.	All types of machine tools for working stone, ceramics, concrete, asbestos cement or like mineral glass and (or) their assemblies /subassemblies /components.	8464 and 84669100
12.	All types of machinery for working rubber and plastics and (or) their assemblies / sub-assemblies /components	8477
13.	All types of Machines including the machines for public works & building and the machinery & mechanical appliances having individual functions, not specified Or included elsewhere in Chapter 84 and (or) their assemblies/subassemblies / components	84791000, 84798999 and 84799090
14.	All types of gears and gearing, toothed wheels, chain sprocket, transmission elements ball or roller screws, gear boxes and speed changers, including torque converters And (or) their assemblies /sub-assemblies /components	84834000 and 84839000
15.	All types of Rotary electrical machines such as Generator, etc. and (or) their assemblies /sub-assemblies /components.	8501 and 8503
16.	All types of Diesel Generator and (or) their assemblies /sub-assemblies / components.	8502 and 8503
17.	All types of Transformers and (or) their assemblies /sub-assemblies /components.	850421, 850422, 850423, 850431, 850432, 850433, 850434 and 850490
18.	All types of Power Semiconductor Converter and (or) their assemblies /sub-assemblies /components.	850440
19.	All types of switch gear and control gear equipment operating at voltages not exceeding 1000 volts and (or) their assemblies /sub-assemblies /components.	8536, 8537 and 8538
20.	All types of switch gear and control gear equipment operating at voltages exceeding 1000 volts and (or) their assemblies /sub-assemblies /components.	8535, 8537 and 8538

Overview of products with already mandatory certification

Cement (any variety of cement manufactured or sold in India) such as			
1.	IS 12330	Sulphate Resisting Portland Cement	1. Cement (Quality Control) Order, 2003 S.O. No. 191(E) Dt. 17 Feb 2003
2.	IS 12600	Low heat Portland Cement	
3.	IS 1489 (Part 1)	Portland Pozzolana Cement-Part 1 Fly-ash based	
4.	IS 1489 (Part 2)	Portland Pozzolana Cement-Part 2 Calcined clay based	
5.	IS 269	Ordinary Portland Cement	
6.	IS 3466	Masonry Cement	
7.	IS 455	Portland Slag Cement	
8.	IS 6452	High Alumina Cement for Structural use	
9.	IS 6909	Super sulphated cement	
10.	IS 8041	Rapid hardening Portland cement	
11.	IS 8042	White Portland Cement	
12.	IS 8043	Hydrophobic Portland Cement	
13.	IS 8229	Oil well Cement	
14.	IS 16415: 2015	Composite Cement- Specification.	
15.	IS 16993: 2018	Microfine Ordinary Portland Cement- Specification.	
16.	IS 15895: 2018	High Alumina Refractory Cement.

Household Electrical goods			
17.	IS 12640 (Part 1)	Residual current operated circuit breakers for house hold and similar uses-Part 1 Circuit breakers without integral overcurrent protection (RCCBs)	2. Electrical Wires, Cables, Appliances and Protection Devices and Accessories (Quality Control) Order, 2003 No. 189(E) dated 17 Feb 2003 Subsequent Amendments: S.O. 165(E) dated 5 Feb 2004 S.O. 1172 (E) dated 22 Aug 2005 S.O. 512(E) dated 19 Feb 2009 S.O. 2058(E) dated 7 Aug 2009 S.O. 2604 (E) dated 19 Oct. 2010
18.	IS 12640 (Part 2)	Residual current operated circuit breakers for household and similar uses-Part 2 Circuit breakers with integral overcurrent protection(RCVOs)	
19.	IS 13010	AC watt-hour meters, class 0.5, 1 & 2	
20.	IS 13779	AC static watt-hour meters, class 1 & 2	
21.	IS 14697	AC static transformer operated watt-hour and VAR-hour meters, class 0.2S & 0.5S	
22.	IS 15111 (Part 1 & 2)	Self Ballasted Lamps for General Lighting Services – Part 1: Safety Requirements & Part 2: Performance Requirements	
23.	IS 302 (Part 2/ Sec 3)	Safety of household and similar electrical appliances – Electric iron	
24.	IS 302 (Part 2/Sec 201)	Safety of household and similar electrical appliances– Electric immersion water-heaters	
25.	IS 302 (Part 2/Sec 202)	Safety of household and similar electrical appliances –Electric stoves	
26.	IS 302 (Part 2/Sec 30)	Safety of household and similar electrical appliances-Room heaters	
27.	IS 3854	Switches for domestic and similar purposes	

Sr No.	IS No.	Product	For Notification Details Please click on the given link
28.	IS 418	Tungsten filament general service electric lamps (upto100 W)	
29.	IS 694	PVC insulated cables for working voltages up to and including 1100V	
30.	IS 8828 *	Electrical Accessories-Circuit breakers for overcurrent protection for household and similar installations	
31.	IS 9968 (Part 1)	Elastomer insulated cables (Part.1): For working voltages up to and including 1100 V	
* Since revised as IS/IEC 60898			
Batteries			
32.	IS 8144	Multi-Purpose dry batteries	3. SO 516(E), dated 25th May 1987
Food & Related Products			
33.	IS 15757	Follow-up formula – complimentary foods	Food Safety & Standards Prohibition & Restriction on Sales, Regulation, 2011 4. GSR 759(E) and GSR 760(E)
34.	IS 11536	Processed cereal based complementary foods	
35.	IS 1165	Milk-powder	
36.	IS 1166	Condensed milk, partly skimmed and skimmed condensed milk	
37.	IS 12176	Sweetened ultra high temperature treated condensed milk	
38.	IS 13334 (Part 1)	Skimmed milk-powder, standard grade	Food Safety & Standards Prohibition & Restriction on Sales, Regulation, 2011 GSR 759(E) and GSR 760(E)
39.	IS 13334 (Part 2)	Skimmed milk-powder, extra grade	Food Safety and Standards (Prohibition and Restrictions on sales) First Amendment Regulations, 2022, dated 31/08/2022
40.	IS 13428	Packaged Natural Mineral Water	
41.	IS 14433	Infant milk substitutes	
42.	IS 17945: 2022	Food for Special Medical Purpose intended for Infants	
43.	IS 14542	Partly skimmed milk powder	

Sr No.	IS No.	Product	For Notification Details Please click on the given link
44.	IS 14543	Packaged Drinking Water (Other than Packaged Natural Mineral Water)	
45.	IS 1656	Milk- cereal Based Complementary foods	
46.	IS 14625	Plastic Feeding Bottles	5. The Infant Milk Substitutes, Feeding Bottles and Infant Foods (regulation of production, supply and distribution), Act 1992
47.	IS 5168	Glass Feeding Bottles	
Oil Pressure Stoves			
48.	IS 10109	Oil pressure stove, offset burner type	6. Oil Pressure Stoves (Q.C) Order, 1997 SO 451(E) dated 16 June 1997
49.	IS 2787	Multi-burner oil pressure stoves	
50.	IS 1342	Oil pressure stoves	
Automobile Accessories			
51.	IS 13098	Automotive vehicles – Tubes for pneumatic tyres	7. Pneumatic Tyres and Tubes for Automotive Vehicles (Quality Control) Order, 2009 S.O. No. 2953(E) dated 19-11-2009 Subsequent Amendments S.O. No. 1057 (E) dated 11-05-2010 S.O. No. 2758 (E) dated 9-11-2010
52.	IS 15627	Automotive vehicles– Pneumatic tyres for two and three-wheeled motor vehicles	
53.	IS 15633	Automotive vehicles-Pneumatic tyres for passenger car vehicles– Diagonal and radial ply	
54.	IS 15636	Automotive vehicles- Pneumatic tyres for commercial vehicles- Diagonal and radial ply	
Cylinder, Valves and Regulator			
55.	IS 14899	Liquefied petroleum gas containers for automotive use	8. Explosive Act, 1884 Gas Cylinder Rules, 2016 G.S.R. No. 1081(E) Dt. 22-11-2016
56.	IS 15100	Multifunction valve assembly for permanently fixed liquefied petroleum gas (LPG) containers for automotive use	
57.	IS 3196 (Part 4)	Welded low carbon steel cylinders exceeding 5 litre Water capacity for low pressure liquefiable gases Part 4 Cylinders for toxic and corrosive gases	
58.	IS 3196 (Part 1)	Welded low carbon steel gas cylinder exceeding 5 litre water capacity for low pressure liquefiable gases Part1 Cylinders for liquefied petroleum gas (LPG)	

Sr No.	IS No.	Product	For Notification Details Please click on the given link
59.	IS 3196 (Part 2)	Welded low carbon steel gas cylinder exceeding 5-litre water capacity for low pressure liquefiable gases Part 2 Cylinders for liquefiable gases other than LPG.	
60.	IS 3224	Valve fittings for compressed gas cylinder excluding liquefied petroleum gas cylinders	
61.	IS 3745	Yoke Type Valve Connection for Small Medical Gas Cylinders	
62.	IS 7142	Welded low carbon steel cylinders for low pressure liquefiable gases not exceeding 5 litre water capacity	
63.	IS 7285 (Part 1)	Refillable Seamless steel gas cylinders Part1 Normalized steel cylinders	
64.	IS 7285 (Part 2)	Refillable Seamless steel gas cylinders Part 2 Quenched and tempered steel cylinders with tensile strength less than 1100 MPa (112 kgf/mm ²)	
65.	IS 7302	Valve fittings for gas cylinder valves for use with breathing apparatus	
66.	IS 7312	Welded and seamless steel dissolved acetylene gas cylinders	
67.	IS 8737	Valve fittings for use with liquefied petroleum gas cylinders of more than 5 litre water capacity Part 2 Valve fittings for newly manufactured LPG cylinders	
68.	IS 8776	Valve Fittings for Use with Liquefied Petroleum Gas (LPG) Cylinders up to and Including 5-Litre Water Capacity	
69.	IS 9798	Low pressure regulators for use with liquefied petroleum gas (LPG) mixtures	

Sr No.	IS No.	Product	For Notification Details Please click on the given link
Medical Equipment			
70.	IS 3055 (Part 1)	Clinical thermometers :Part1 Solid stem type	9. Clinical Thermometers (Quality Control), 2001 GSR No. 843(E) dated 9 Nov. 2001
71.	IS 3055 (Part 2)	Clinical thermometers :Part 2 Enclosed scale type	
72.	IS 7620 (Part 1)	Diagnostic Medical X-Ray Equipment	10. Diagnostic Medical X- Ray Equipment AERB/443/39 MDX/3509/94,Oct. 94
Steel and Iron Products			
73.	IS 1785 (Part 1) : 1983	Plain Hard-drawn Steel Wire For Pre-stressed Concrete: Part 1 Cold Drawn Stress-relieved Wire	Steel and Steel Products (Quality Control) Order, 2020 S.O. 756(E) , dated 14-02-2020
74.	IS 1785 (Part 2) : 1983	Plain hard-drawn steel wire for pre-stressed concrete Part 2: As drawn wire	Superseded by Steel and Steel Products (Quality Control) Order, 2020 S.O. 1673(E), dated 27-05-2020
75.	IS 6003:2010	Indented wire for Pre-stressed concrete	Superseded by Steel and Steel Products (Quality Control) Order, 2020 (S.O. 2379(E), dated 17-07-2020)
76.	IS 6006:2014	Uncoated stress relieved strand for Pre-stressed concrete.	Extension in date of enforcement for Steel Products Order File.No. S-20011/1/2020-TECH dated 22.07.2020 Extension Order
77.	IS 13620:1993	Fusion bonded epoxy coated reinforcing bars	Superseded by Steel and Steel Products (Quality Control) Order, 2020 (S.O. 4082(E), dated 12.11.2020)
78.	IS 14268:1995	Uncoated Stress Relieved Low Relaxation Seven-ply Strand For Pre-stressed Concrete.	Superseded by Steel and Steel Products (Quality Control) Order, 2020 (S.O. No. 4637 (E) 22/12/2020)
79.	IS 277:2003	Galvanized steel sheets (plain and corrugated).	Order of extension in the enforcement date for Indian Standards covered under the Quality Control Order (namely IS 3748, IS 7291, and IS 12146)
80.	IS 2002:2009	Steel plates for pressure vessels for intermediate and high temperature service including boilers.	Order of extension in the enforcement date for some Indian Standards covered under the Quality Control Order (namely IS 4398 and IS 3195)

Sr No.	IS No.	Product	For Notification Details Please click on the given link
81.	IS 2041:2009	Steel plates for pressure vessels used at moderate and low temperature	Order of extension in the enforcement date for some Indian Standards covered under the Quality Control Order (namely IS 6526, IS 4454 (Part 4), IS 11946, IS 11947 and IS 12045)
82.	IS 2830:2012	Carbon steel cast billet ingots, billets, blooms and slabs for rerolling into steel for general structural purpose	Extension in date of enforcement Order (namely IS 1110, IS 4409)
83.	IS 1786:2008	High strength deformed steel bars and wires for concrete reinforcement	Extension in date of enforcement Order (namely IS 4432, IS 5518, IS 12145, IS 13387, IS 4072 & IS 13352)
84.	IS 648:2006	Cold rolled non-oriented electrical steel sheets and strip-fully processed type (CRNO)	Extension in date of enforcement Order (namely IS 7226, IS 14331)
85.	IS 3024:2015	Grain oriented electrical steel sheet & strip (CRGO)	Extension in date of enforcement Order (namely IS 6529)
86.	IS 15391:2003	Oriented Electrical Steel Sheet and Strip- Semi-Processed Type- Specification.	Extension in date of enforcement Order (namely IS 1993, IS 12591)
87.	IS 2062:2011	Hot rolled medium and high tensile structural steel	Extension in the date of enforcement of Quality Control Order on IS 3748, IS 7291 and IS 12146
88.	IS 432 : Part 1:1982	Mild Steel and Medium Tensile Steel Bars and Hard-Drawn Steel Wire for Concrete Reinforcement: Part 1 Mild steel and medium tensile steel bars	Order of extension in the date of enforcement of Quality Control Order for Indian Standards IS 4454 (Part 4): 2001, IS 11946: 1987 & IS 11947: 1987
89.	IS 432 : Part 2:1982	Mild steel and Medium Tensile steel bars and Hard-Drawn Steel Wire for Concrete Reinforcement: Part 2 Hard-Drawn Steel Wire	Extension in date of enforcement order (namely IS 1110: 1990 & IS 4409: 1973)
90.	IS 513 (Part-1): 2016	Cold reduced carbon steel sheets and strips Part 1 Cold Forming and Drawing Purpose	Extension in date of enforcement order (namely IS 14331:1995)
91.	IS 513(Part-2):2016	Cold reduced carbon steel sheets and strips Part 2 High Tensile and Multi-phase Steel	Extension in date of enforcement order (namely IS 13387:1992)
92.	IS 1079: 2017	Hot Rolled Carbon Steel Sheet, Plate and Strip — Specification.	Extension in date of enforcement order (namely IS 1110: 1990 & IS 4409: 1973)

Sr No.	IS No.	Product	For Notification Details Please click on the given link
93.	IS 1875:1992	Carbon steel billets, blooms, slabs and bars for forgings.	Extension in date of enforcement order (namely IS 1110: 1990 & IS 4409: 1973) , dated 01 November 2022
94.	IS 2879:1998	Mild steel for metal arc welding electrodes.	Extension in date of enforcement order (namely IS 4409: 1973) , dated 06 February 2023
95.	IS 3502:2009	Steel Chequered Plates	Extension in date of enforcement order (namely IS 4409 : 1973, dated 25th July 2023)
96.	IS 5872:1990	Cold Rolled Steel Strips (Box Strappings).	11.Steel and Steel Products (Quality Control) Order, 2024 S.O. 574(E) dated on 5th February, 2024
97.	IS 5986: 2017	Hot Rolled Steel Sheet, Plate and Strip for Forming and Flanging Purposes — Specification.	Extension in date of enforcement order (namely IS 4409: 2023, dated 01 May 2024)
98.	IS 6240:2008	Hot Rolled Steel Plate (up to 6 mm) Sheet and Strip for the Manufacture of Low Pressure Liquefiable Gas Cylinders	
99.	IS 7283:1992	Hot Rolled bars for production of bright bars and machined parts for engineering applications.	
100.	IS 7887:1992	Mild steel wire rods for general engineering purposes.	
101.	IS 10748:2004	Hot Rolled Steel Strip for Welded Tubes and Pipes.	
102.	IS 11513:2017	Hot Rolled Carbon Steel Strip for Cold Rolling Purposes — Specification	
103.	IS 15647:2006	Hot rolled steel narrow width strip for welded tubes and pipes	
104.	IS 7904:2017	High carbon steel wire rods- Specification	
105.	IS 14246:2013	Continuously pre-painted galvanized steel sheets and coils	
106.	IS 15965:2012	Pre-painted aluminium zinc alloy metallic coated steel strip and sheet (Plain).	
107.	IS 280: 2006	Mild steel wire for General Engineering purposes.	
108.	IS 1835:1976	Round Steel wire for ropes	

Sr No.	IS No.	Product	For Notification Details Please click on the given link
109.	IS 3975:1999	Low Carbon Galvanized steel wires formed wires and Tapes for armouring of Cables	
110.	IS 4368:1967	Alloy Steel billets, blooms and slabs for forging for general engineering purposes.	
111.	IS 4454 (Part 1) : 2001	Steel wire for mechanical springs Part-1 cold drawn unalloyed steel wire.	
112.	IS 4454 (Part 2): 2001	Steel wire for mechanical springs Part-2 oil hardened and tempered steel wire.	
113.	IS 4824:2006	Bead Wires for Tyres	
114.	IS 11169 (Part 1): 1984	Steels for Cold Heading/Cold extrusion application Part-1 Wrought carbon and low alloy steels	
115.	IS 11587:1986	Structural Weather resistant steel.	
116.	IS 15103: 2002	Fire resistant Steel- Specification	
117.	IS 15914:2011	High Tensile Strength Flat Rolled Steel Plate (Up to 6 mm), Sheet and Strip for the Manufacture of Welded Gas Cylinder.	
118.	IS 15961:2012	Hot Dip aluminium- Zinc alloy metallic coated steel strip and sheet (Plain)	
119.	IS 15962:2012	Structural Steel for Building for Structures with improved seismic Resistance	
120.	IS 6527:1995	Stainless Steel wire Rod	
121.	IS 6528:1995	Stainless Steel Wires	
122.	IS 6603:2001	Stainless Steel Bars and Flats	
123.	IS 5522:2014	Stainless Steel sheets and strips for utensils- Specification & nbsp;	
124.	IS 6911:2017	Stainless Steel Plate, Sheet and Strip- Specification	
125.	IS 15997:2012	Low Nickel Austenitic Stainless Steel Sheet and Strip For Utensils and Kitchen Applications- Specification	
126.	IS 1110 : 1990	Ferrosilicon – Specification	

Sr No.	IS No.	Product	For Notification Details Please click on the given link
127.	IS 4409 : 1973	Specification for Ferronickel	
128.	IS 1029 : 1970	Specification for Hot rolled steel strip (bailing)	
129.	IS 2385 : 1977	Specification for Hot-rolled mild steel sheet and strip in coil form for cold-reduced tinsplate and cold-reduced black plate	
130.	IS 3039 : 1988	Specification for Structural steel for construction of hulls of ships	
131.	IS 9550 2001	Bright steel bars – v Specification	
132.	IS 3748 : 1990	Tool and die steels – Specification	
133.	IS 5517 : 1993	Steel for hardening and tempering – Specification	
134.	IS 16732: 2019	Galvanized Structural Steel – Specification	
135.	IS 7494 : 1981	Specification for Steel for valves for internal combustion engines	
136.	IS 12146 : 1987	Specification for Carbon manganese steel forgings for pressure vessels	
137.	IS 16585 : 2016	Magnetic materials – specification for individual material – Fe based amorphous strip delivered in the semi-processed state.	
138.	IS 2831 : 2012	Carbon steel cast billet ingots, billets, blooms and slabs for re-rolling into structural steel (ordinary quality) – Specification	
139.	IS 1148: 2009	Steel Rivet Bars (medium And High Tensile) – For Structural Purposes	
140.	IS 1673: 1984	Specification for Mild Steel Wire, Cold Heading Quality	
141.	IS 1812: 1982	Specification for Carbon Steel Wire for the Manufacture of Wood Screws	
142.	IS 2507: 1975	Specification for Cold – rolled Steel Strips For Springs.	
143.	IS 2255: 1977	Specification for Mild Steel Wire Rod for the Manufacture of Machine Screws (By Cold Heading Process).	
144.	IS 3195: 1992	Steel For the Manufacture of Volute And Helical Springs (for Railway Rolling Stock) – Specification .	

Sr No.	IS No.	Product	For Notification Details Please click on the given link
145.	IS 3431:1982	Specification for Steel for the manufacture of volute, helical and laminated springs for automotive suspension.	
146.	IS 3885-Part-1:1992	Steel for the manufacture of laminated springs (railway rolling stock) Part 1 Flat Sections – Specification.	
147.	IS 3885-Part- 2:1992	Steel for the manufacture of laminated springs (railway rolling stock) Part 2: Rib and Groove Sections- Specification.	
148.	IS 4223: 1975	Specification for Steel Wire for Umbrella Ribs .	
149.	IS 4224: 1972	Specification for Steel Wire for Staples, Pins And Clips.	
150.	IS 4397:1999	Cold-rolled Carbon Steel Strips for Ball and Roller Bearing Cages/ Retainers- Specification.	
151.	IS 4398: 1994	Carbon-chromium Steel for the Manufacture of Balls, Rollers and Bearing Races- Specification	
152.	IS 6902: 1973	Specification for Steel Wire for spokes.	
153.	IS 6967: 1973	Specification for Steel For Electrically welded round Link Chains.	
154.	IS 7226: 1974	Specification for Cold rolled medium, high carbon and low alloy steel strip for general engineering purposes.	
155.	IS 7557:1982	Specification for Steel Wire: (Up to 20 mm) for the manufacture of cold-forged rivets.	
156.	IS 8052: 2006	Steel ingots, billets and blooms for the production of springs, rivets and screws for general engineering applications – Specification.	
157.	IS 8951: 2001	Steel Cast Billet Ingots, Billets and Blooms for production of High Carbon Steel Wire Rods- Specification	
158.	IS 8952: 1995	Steel ingots, blooms and billets for production of mild steel wire rods for general engineering purposes – Specification	
159.	IS 9476: 1980	Specification for Cold rolled steel strips for carbon steel razor blades.	
160.	IS 9962: 1981	Specification for Steel Wire for Needles.	

Sr No.	IS No.	Product	For Notification Details Please click on the given link
161.	IS 17111:2019 (ISO 683- 17:2014)	Heat-Treated Steels Alloy and Free-Cutting Steels — Ball and Roller Bearing Steels.	
162.	IS 14331:1995	Steels for High Temperature Bolting Applications – Specification	
163.	IS 12594: 1988	Hot-dip Zinc Coating on Structural Steel Bars for Concrete Reinforcement – Specification

510.	IS 5405:2019	Sanitary napkins	<p>132. Medical Textiles (Quality Control) Order, 2023 S.O. 4247(E), dated 27th September 2023</p> <p>Medical Textiles (Quality Control) Amendment Order, 2024 (S.O. 830(E), dated 22nd February, 2024)</p>
511.	IS 17509:2021	Disposable baby diaper	
512.	IS 17514:2021	Reusable Sanitary pad/ Sanitary Napkin/ Period Panties	
513.	IS 17349:2020	Shoe covers	
514.	IS 17354:2020	Dental Bib or Napkins	
515.	IS 17630:2021	Bed sheet and Pillow Cover	
Agro Textiles			
516.	IS 16718:2021	Polypropylene Spun Bonded Non— Woven Crop Cover and Fruit Skirting Bags for Agriculture and Horticulture Applications	<p>133. Agro Textiles (Quality Control) Order, 2023 S.O. 4248(E), dated 27th September 2023</p> <p>Agro Textiles (Quality Control) Amendment Order, 2024 S.O. 1579(E), dated 28th March 2024</p>
517.	IS 16513:2016	Insect nets for Agriculture and Horticulture purpose	
518.	IS 16202:2014	Woven Ground covers for Horticulture Application	
519.	IS 17070:2019	Jute Agro textiles for Growth of Plants and Suppression of Weeds	

Sr No.	IS No.	Product	For Notification Details Please click on the given link
520.	IS 15907 : 2010	High Density Polyethylene (HDPE) woven beds for vermiculture	
521.	IS 16089 : 2013	Sapling bags for growth of seedling / sapling	
522.	IS 16190 : 2014	High Density Polyethylene (HDPE) laminated woven lay flat tube for irrigation purpose	
523.	IS 16390 : 2015	Nylon Knitted seamless gloves for tobacco harvesters	
524.	IS 16627 : 2017	High density polyethylene (HDPE) laminated woven lay flat tube for use in mains and submains of drip irrigation system	
525.	IS 17355 : 2020	Propylene Spun bonded non—woven mulch mat for agriculture and horticulture applications	
526.	IS 17356 : 2020	Windshield nets for agriculture and horticulture purpose	
527.	IS 17357 : 2020	Harvest nets for agriculture and horticulture purposes	
528.	IS 17358 (Part 1) : 2020	Fencing nets for agriculture and horticulture purposes – made from extruded polymer mesh	
529.	IS 17358 (Part 2) : 2020	Fencing nets for agriculture and horticulture purposes -made from mono filament yarns and combination of tape and mono filament yarns	
530.	IS 17513 : 2020	Plant Support Nets for Agriculture and Horticulture Purposes	
531.	IS 17728 : 2021	High Density Polyethylene (HDPE) Laminated Woven Lay Flat Tube and Fittings for use in Rain Irrigation System	
532.	IS 17729 : 2021	Flexible Water Storage Tank for Agriculture and Horticulture Purposes	
533.	IS 17730 (Part 1) : 2021	Hail Protection Nets for Agriculture and Horticulture Purposes- Warp Knitted Hail Protection Nets	
534.	IS 17730 (Part 2) : 2021	Hail Protection Nets for Agriculture and Horticulture Purposes – Woven Hail Protection Nets	
535.	IS 17731 : 2021	Laminated Woven Orchard Protection Covers

Overview of Products with Implementation date

**UPCOMING CQOS
COMPLETE OVERVIEW – SORTED BY MINISTRIES**

Ministry of Steel		
Specification for Ferronickel	IS 4409 : 2023	23 July 2024

Department for Promotion of Industry and Internal Trade		
Industrial and protective rubber knee and ankle boots	IS 5557: 2004	01. Aug 24
All rubber gum boots and ankle boots	IS 5557 (Part 2): 2018	01. Aug 24
Moulded Rubber Outsoles	IS 5676: 1995	01. Aug 24
Microcellular Rubber Sheets for Outsoles	IS 6664: 1992	01. Aug 24
Moulded PVC Outsoles	IS 6719: 1972	01. Aug 24
Sandal and Slippers	IS 6721: 2023	01. Aug 24
Hawai Chappal	IS 10702: 2023	01. Aug 24
Polyvinyl chloride (PVC) industrial boots	IS 12254: 2021	01. Aug 24
Polyurethane Outsoles	IS 13893: 1994	01. Aug 24
Unlined moulded rubber boots	IS 13995: 1995	01. Aug 24
Moulded plastics footwear- Lined or Unlined polyurethane boots for general industrial use	IS 16645: 2018	01. Aug 24
Footwear for men and women for municipal scavenging work	IS 16994: 2018	01. Aug 24
Leather safety boots and Shoes for miners	IS 1989(Part-1): 1986	01. Aug 24
Leather safety boots and shoes for heavy metal industries	IS 1989(Part-2): 1986	01. Aug 24

Canvas Shoes Rubber Sole	IS 3735:1996	01. Aug 24
Canvas Boots Rubber Sole	IS 3736:1995	01. Aug 24
Safety Boots for Miners	IS 3976:2018	01. Aug 24
Leather safety footwear having direct moulded rubber sole	IS 11226:1993	01. Aug 24
Leather safety and protective footwear with direct moulded Polymeric sole	IS 14544:2022	01. Aug 24
Sports Footwear for General Purpose	IS 15844(Part-1):2023	01. Aug 24
Sports Footwear for Performance Sports Footwear	IS 15844(Part-2):2023	01. Aug 24
Sports Footwear for Professional Sports Footwear	IS 15844(Part 3):2024	01. Aug 24
High ankle tactical boots with PU – Rubber sole	IS 17012:2018	01. Aug 24
Anti-riot shoes	IS 17037:2018	01. Aug 24
Shoes for Services	IS 17043 (Part-1):2024	01. Aug 24
Shoes for General Purpose	IS 17043 (Part-2):2024	01. Aug 24
Morpholine	IS 12084:2018	01. Aug 24
Acetic Acid	IS 695:1986	03. Aug 24
Aniline	IS 2833:2019	03. Aug 24
Methanol	IS 517:1986	03. Aug 24

Low-Voltage Switchgear and Controlgear Part 5 Control Circuit Devices and Switching Elements Section 2 Proximity Switches (First Revision)	All types of product ratings	IS/IEC 60947: Part 5 : Sec 2 : 2019	10 May 2025
Low-Voltage Switchgear and Controlgear Part 5 Control Circuit Devices and Switching Elements Section 5 Electrical emergency stop devices with mechanical latching function	All devices with button type actuator	IS/IEC 60947: Part 5 : Sec 5 : 2016	10 May 2025
	All devices with all types of actuator		10 May 2026
Low-Voltage Switchgear and Controlgear Part 5 Control Circuit Devices and Switching Elements Section 1 Electromechanical Control Circuit Devices (Second Revision)	All AC utilization categories Upto 440V AC (All test other than Electromagnetic Compatibility (EMC))	IS/IEC 60947: Part 5 : Sec 1 : 2016	10 May 2025
	All AC utilization categories Upto 440V AC (With EMC)		10 May 2026
	All AC utilization categories Above 440V AC		10 May 2026
	All DC utilization categories, All DC ratings		10 May 2027
	AC Circuit – Breakers (Category A)- All ratings upto 630 A, upto 440V AC (All test other than Electromagnetic Compatibility (EMC))		IS/IEC 60947: Part 2 : 2016
Low – Voltage switchgear and controlgear: Part 2 circuit – Breakers	AC Circuit – Breakers (Category A)- All ratings upto 630 A, upto 440V AC (With EMC)	IS/IEC 60947: Part 2 : 2016	10 May 2026
	AC Circuit- Breakers (Category – A)-All ratings above 630A, uptown 440V AC (All test other than Electromagnetic Compatibility (EMC))	IS/IEC 60947: Part 2 : 2016	10 May 2025
	AC Circuit – Breakers (Category – A)- All ratings above 630A, upto 440V AC (With EMC)	IS/IEC 60947: Part 2 : 2016	10 May 2026
	AC Circuit – Breakers (Category – B)- All ratings upto 2000 A, upto 440V AC (All test other than Electromagnetic Compatibility (EMC))	IS/IEC 60947: Part 2 : 2016	10 May 2025
	AC Circuit – Breakers (Category – B)- All ratings upto 2000 A, upto 440V AC (With EMC)	IS/IEC 60947: Part 2 : 2016	10 May 2026

Low-Voltage Switchgear and Controlgear Part 3 Switches, Disconnectors, SwitchDisconnectors and Fuse-Combination Units (Second Revision)	AC Circuit Breakers (Category – B)- All ratings upto 2000 A, upto 440V AC (All test other than Electromagnetic Compatibility (EMC))	IS/IEC 60947: Part 2 : 2016	10 May 2025
	AC Circuit Breakers (Category – B)- All ratings upto 2000 A, upto 440V AC (With EMC)	IS/IEC 60947: Part 2 : 2016	10 May 2026
	AC Circuit – Breakers (Category – A)- All ratings, above 440V AC	IS/IEC 60947: Part 2 : 2016	10 May 2026
	AC Circuit – Breakers (Category- B)- ratings above 2000A, Upto 440V AC	IS/IEC 60947: Part 2 : 2016	10 May 2026
	AC Circuit – Breakers (Category -B)- All ratings, above 440V AC	IS/IEC 60947: Part 2 : 2016	10 May 2027
	DC Circuit – Breakers (Category – A) All ratings	IS/IEC 60947: Part 2 : 2016	10 May 2027
	DC Circuit – Breakers (Category -B) All ratings	IS/IEC 60947: Part 2 : 2016	10 May 2027
Low-Voltage Switchgear and Controlgear Part 3 Switches, Disconnectors, SwitchDisconnectors and Fuse-Combination Units (Second Revision)	All AC utilization categories Upto 250A, Upto 440V AC (All test other than Electromagnetic Compatibility (EMC))	IS/IEC 60947: Part 3 : 2020	10 May 2025
	All AC utilization categories Upto 250A, Upto 440V AC (With EMC)		10 May 2026
	All AC utilization categories Upto 630 A, Upto 440V AC		10 May 2026
	All AC utilization categories Above 630 A, Upto 440V AC		10 May 2027
	All AC utilization categories All ratings, above 440V AC		10 May 2028
	All DC utilization categories, All rating		10 May 2028

Low-Voltage Switchgear and Controlgear Part 4 Contactors and Motor-Starters Section 1 Electromechanical Contactors and Motor-Starters (Second Revision)	Contactor -All AC utilization categories Upto 32A (All test other than Electromagnetic Compatibility (EMC))	IS/IEC 60947: Part 4 : Sec 1: 2018	10 May 2025
	Contactor -All AC utilization categories Upto 32A (With EMC)		10 May 2026
	Contactor -All AC utilization categories, above 32A		10 May 2026
	Starter- All AC utilization categories direct-on-line a.c. starter		10 May 2027
	Starter- All AC utilization categories. All other Starters		10 May 2028
	All DC utilization categories. All DC ratings		10 May 2028

Founded in 1956, the Indo-German Chamber of Commerce or AHK India is the first point of contact for Indian and German companies who want to do business with each other. We are a membership-based organization that provides advice and services to its members, on Indo-German cooperation initiatives and act as the voice of the German- Indian business community at the institutional and governmental level.

We play a crucial role in strengthening economic and cultural cooperation between India and Germany, by providing our members with a wide range of services in various areas such as business start-ups, business partner search, vocational training and management training, staff recruitment, events, delegations, sustainability services and much more.

We are part of the worldwide network of German Chambers of Commerce Abroad (AHK) with 140 offices in 92 countries. With almost

With 4,000 members, we are the largest chamber within the AHK network as well as the largest bilateral chamber of commerce in India. Headquartered in Mumbai and with six offices (Delhi, Chennai, Kolkata, Bengaluru,

Pune and Dusseldorf), we are the biggest catalyst for the promotion of trade and labour relations between India and Germany. We offer networking platforms, reliable contacts and valuable services for German and Indian companies.

MPR International GmbH is your trusted partner for product certification in Asian markets, particularly in India, Korea, Japan, China, and Taiwan.

We guide you through the entire certification process, ensuring your products comply with the specific requirements of each market. Our in-depth knowledge of evolving international regulations and market conditions allows us to help you seize new opportunities, enabling successful product entry into these Asian markets.

Our clients primarily come from industries such as automotive, electronics, mechanical engineering, petrochemical, household goods, toys, and food. We understand the unique certification and testing requirements of these sectors and have extensive experience managing the complex testing and factory audit processes.

Our dedicated and experienced international team of experts provides prompt, solution-focused responses to your queries, ensuring replies within 24 hours. We prioritize making the certification process as efficient and straightforward as possible to minimize your workload.

With customized solutions and a high level of professionalism, we ensure your products reach the Asian market smoothly and without delay. Trust MPR International — with our many years of experience and deep expertise, we can help you achieve your business goals and successfully position your products in Asia.

Qualitätsinfrastruktur (gpqi.org)

The Global Project Quality Infrastructure (GPQI) of the German Federal Ministry for Economic Affairs and Climate Action (BMWK) is engaged in technical and political dialogue with partner countries such as India in order to reduce technical barriers to trade, increase product safety and strengthen consumer protection. The BMWK has commissioned the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH to support the implementation of the GPQI.

Areas of cooperation
Strategic dialogue on standardisation, technical regulations (QCOs), conformity assessment, accreditation, product safety and market surveillance to promote systemic harmonisation at international level

Key stakeholders
Indian Ministries, Quality Infrastructure Committees, Chambers of Commerce and Associations, Industry

Focus Topics / Industries
Digitalization (Industry 4.0, Artificial Intelligence and Cybersecurity), Machine Safety, Medical Devices and Automotive
