Application Developer SAP Business Intelligence (m/f)

Your Role

- You maintain all matters concerning the modelling of Business Warehouse objects like infoproviders, infosources, datasources, infoobjects, transformations and programming of ABAP routines
- You support our user worldwide as competent consultant regarding explanation and development of business content, requirement gathering, usability of tools and daily appearing ad hoc requests
- You develop and design queries and workbooks at BEx Query Designer and Analysis for Office/BI launchpad
- You design reports and dashboards along the toolset of SAP Business Objects (SAP Lumira Designer and Web Intelligence)

Requirements

- You have about three years of experience at SAP BW/SAP BI with full cycle implementation in the area of data modeling, data extraction, queries, identification and installation of business contents, process chains and reporting tools
- You are familiar with financial and/or logistical processes along SAP/R3
- One of your favorite knowledge areas is SAP Business Objects with tools like SAP Lumira Designer and SAP Web Intelligence as main focus
- You have strong analytical skills in combination with a high level of independency as well as strong communication skills to support the SAP BI users and to report to your Team-Lead and BI Manager

Our Offer

- We offer a challenging position in an international company with a focus on long-term cooperation
- You will have the chance to participate at shaping a BI support center India for supporting the entire SEEPEX group worldwide
- This challenging position is the ideal basis to apply your experience in SAP BW/SAP BI
- Completing our offer, an excellent opportunity to develop personally and an attractive remuneration awaits you

We look forward receiving your application documents!
