

SAP Ariba Consultant

A leading multinational consulting company is looking for a SAP Ariba Consultant with at least 3 years of project experience in process and implementation consultancy of purchasing solutions.

The company's product portfolio includes custom-tailored solutions along the entire value chain – servicing to all business units from sourcing and procurement to sales and overarching data management. The company comprehends the challenges that business departments face and are experts in incorporating their SAP solutions with other applications to optimize and digitalize its customers' key processes.

Key Responsibilities:

- Defining overall application and business requirements with end users
- Assist customers in the selection, implementation, and support of Ariba for SAP.
- Be actively involved in all phases of the project including problem definition, effort estimation, diagnosis, solution generation, design and deployment.
- Respond to technical queries / requests from team members and customer.
- Contribute to unit-level and organizational initiatives through observing the organizational strategies and processes of the customers' business
- Designing of correspondence, presentations, and other materials for knowledge transfer
- Be able to solve complex problems considering computer equipment capacity and limitations, operating time, and form of desired results.

Education:

MBA or comparable degree from Premier Institutes or B.Tech / B.E or comparable degree in any stream from Premier institutes like IITs, NITs, BITS Pilani etc.

Hard skills/experience:

- Experience of at least 1 full cycle implementation of SAP Ariba purchasing solution (End to End implementation)
 - Ariba On-Demand (Sourcing, Contract Management, and Procure to Pay)
 - Ariba On-Premise (Ariba 8.2 and 9r1 with Upstream and Downstream modules)
- Knowledge and experience in implementation planning, fit analysis, configuration, testing, rollout and post-implementation support
- Strong development skills in ABAP, UI5, Fiori, and/or PI/PO
- Project implementation experience in S/4HANA and/or SAP Cloud Platform will be advantageous

Technology know-how:

- BRF+ (business rules framework plus)
- FPM (Floor plan manager)
- WebDynpro
- BOPF (Business objects processing framework)
- PPF (Post processing framework)
- SOAP web services

Required soft skills:

- Excellent communication and presentation skills in English
- Strong analytical / problem solving skills.
- Ability to translate between non-technical business users and technical IT resources
- High level of client orientation
- Good organizational and time management skills
- Motivated team player
- Knowledge of German language will be advantageous

Job location: Pune
